Top Safety Features on Our Bumper Pull Trailers

SafeTack® Design (patented)

Eliminates the dangerous narrow doorway found on conventional slant load trailers. Instead, a lockable tack area swings out like a second door, allowing an extra wide loading area.

SafeKick® Walls and SafeBump® Ceiling

Flexible and durable composite materials on the walls and ceiling protect your horse from injury.

Patented Z-Frame®

Lightweight Construction

Superior strength over aluminum protects your horses in case of an accident. Our 16-gauge Galvalite skin is 5 times stronger than 0.040 aluminum for an overall lightweight trailer.

Rubber Flooring

Aluminum floors corrode and weaken with time. Rubber provides lasting durability and easy cleaning. Plus, it reduces noise and vibration to lower stress levels and minimize leg fatigue.

Top Safety Features on Our Bumper Pull Trailers

'Green' Design

We've nixed the use of many harmful chemicals in our manufacturing process.

Patented Reverse Load Trailer Models

Studies have shown that horses are less stressed and fatigued after riding in a rear-facing trailer.

Tubular Dividers

Increase air flow and visibility with see-through tubular head dividers.

Quiet Interior

Rivet-free design, secure divider fasteners, and floor materials create a quieter interior so your horse can relax.

100% Fully Insulated - "Stay cool!"

Enjoy comfortable temperatures year-round with full insulation from front to rear. All materials - even the paint colors - are chosen with temperature and safety in mind.
