

# One Horse Bumper Pull with Living Quarters Trailer

Customize This Model

If you own just one horse and you want convenient living quarters without the hassle of a huge trailer, this model is perfect for you!

This is our popular one horse living quarters horse trailer that weighs only 5,100 lbs with a tongue weight of only 600 lbs. This means it's the perfect little trailer to transport your single prized horse. The living quarters area has a drop down dinette for eating which converts into a bed. A small kitchenette is available for meal prep along with a bathroom.

**Please note, this is one of the ONLY safe bumper pull living quarters model on the market.** Since it only carries a single horse, we can be sure of load distribution. Other bumper pull living quarter models on the market for 2+ horses often have unsafe axle placement. This results in excessive tongue weight on the tow vehicle, or in some cases, even negative tongue weight which can cause dangerous trailer sway.

- Z-Frame Technology
- Easy to tow with a half ton pick up truck or full size SUV. Tongue weight of only 600 lbs and trailer weight of 5,100 lbs.
- SafeKick® Wall System
- One Piece Fiber composite SafeBump Roof system. (It can't ever leak.)
- Standard size stall will support a horse up to a 15.2. Optional 16.2 Thoroughbred option or 17 hand warmblood.
- Customize features tailored to your specific hauling requirements and need.
- Ideal for one person and one horse

# Top Safety Features on Our Bumper Pull Trailers

## **SafeTack® Design** (patented)

Eliminates the dangerous narrow doorway found on conventional slant load trailers. Instead, a lockable tack area swings out like a second door, allowing an extra wide loading area.

## **SafeKick® Walls and SafeBump® Ceiling**

Flexible and durable composite materials on the walls and ceiling protect your horse from injury.

## **Patented Z-Frame®**

### **Lightweight Construction**

Superior strength over aluminum protects your horses in case of an accident. Our 16-gauge Galvalite skin is 5 times stronger than 0.040 aluminum for an overall lightweight trailer.

## **Rubber Flooring**

Aluminum floors corrode and weaken with time. Rubber provides lasting durability and easy cleaning. Plus, it reduces noise and vibration to lower stress levels and minimize leg fatigue.

pull trailer now!

# Top Safety Features on Our Bumper Pull Trailers

## 'Green' Design

We've nixed the use of many harmful chemicals in our manufacturing process.

## Patented Reverse Load Trailer Models

Studies have shown that horses are less stressed and fatigued after riding in a rear-facing trailer.

## Tubular Dividers

Increase air flow and visibility with see-through tubular head dividers.

## Quiet Interior

Rivet-free design, secure divider fasteners, and floor materials create a quieter interior so your horse can relax.

## 100% Fully Insulated - "Stay cool!"

Enjoy comfortable temperatures year-round with full insulation from front to rear. All materials - even the paint colors - are chosen with temperature and safety in mind.
