# How We Raise the Bar for Horse Trailers: Top Horse Safety Features

From hitch to bumper, we've looked at every detail on your trailer to make it safe, easy-to-use, and durable.

Here are just a few of those features that help us create a higher standard.

## **SafeTack® Design** (patented)

Eliminates the dangerous narrow doorway found on conventional slant load trailers. Instead, a lockable tack area swings out like a second door, allowing an extra wide loading area.

## **SafeKick® Walls and SafeBump® Ceiling**

Flexible and durable composite materials on the walls and ceiling protect your horse from injury.

## **Patented Z-Frame®**

### **Lightweight Construction**

Superior strength over aluminum protects your horses in case of an accident. Our 16-gauge Galvalite skin is 5 times stronger than 0.040 aluminum for an overall lightweight trailer.

## **Rumber Flooring**

Aluminum floors corrode and weaken with time. Rumber provides lasting durability and easy cleaning. Plus, it reduces noise and vibration to lower stress levels and minimize leg fatigue.
